Don't miss a formidable line up of speakers at the WASHAA Panel Discussion on the hidden epidemic of misdiagnosis. From newborns to seniors, individuals can face wrong, delayed or missed diagnoses at any time; while at the physician's office or during a hospital stay, at the ER or during diagnostic testing, and pretty much at any point while navigating the healthcare system. Being able to detect a wrong, delayed or missed diagnosis can save time, money, and most importantly, lives.

Whether you are an advocate, a patient or a provider, learn how to avoid or deal with a misdiagnosis, get actionable tips and tools for yourself, your loved ones or your patients, and take part in our interactive and lively discussion!
